WORK EXPERIENCE

SEVERAL DIFFERENT EMPLOYERS
Jun 2008 - Mar 2022

Service jobs

I have a lot of experience in various service professions, mostly within the retail industry. I have mainly sold technology products and household appliances, but also groceries and meals. In addition to sales, I have worked in customer service, drain cleaning, and as a restaurant assistant.

I have been responsible for cash management, staff, opening/closing procedures, and cleaning. My previous employers include Elgiganten, Teknikmagasinet, Destination Gotland, and Spolab.

FREELANCE
Apr 2023 - Present

Freelance

I work as a freelance developer where I take on frontend, backend, or database tasks depending on what is needed.

EDUCATION

ANDERS LJUNGSTEDTS GYMNASIUM
2010

Theatre

High school program with a focus on theater. Besides dramaturgy, this program has helped me greatly in customer management and social interactions, as well as maintaining composure under stressful circumstances.

SCHOOL OF APPLIED TECHNOLOGY
Stockholm
2023

Fullstack developer

I trained to become a fullstack developer. We worked in a "mob," which is a small group where we needed to collaborate on the code as we shared one computer. I learned everything from frontend, backend, and databases to UX and ethics, and I also have knowledge of agile work practices.
